

## Air Dried & Kiln Dried Timber

This is our range of timber for furniture making, for joinery, for bespoke flooring projects & high quality decking and cladding products.

These timbers are sourced from English woodlands, France & other European countries as well as some from north America and central Africa. We source English logs, cut them through and through and then leave them to season and air dry them in yard on the South Downs. Our customers take air dried (AD) timber for external joinery, yurt-making, steam-bending to name but a few uses.

The kiln dried (KD) timber has been dried to make it suitable for internal use. It is available for you to come and select yourself or we can give you a quote for a cutting list and machine it for you into the sizes you need. We also have a small pieces rack if you don't want to take whole boards away.

Our machine shop can cut, plane and profile any of our timber to your requirements. Our Weing 6 sided moulder makes light work of machining existing profile shapes but we can also offer bespoke profiles (have you always wanted to design your own?) or a profile matching service – where get cutters made to your specification - for restoration and heritage projects.

Below are some examples of species, sizes and prices of AD or KD timber stock:

Origin	Species	Board type	Available Thickness mm	Width range mm bark to bark	Lengths up to M	From £/ft3
Eng	Ash	T&T	27, 34,41,54,65,80,100	200 - 800	5.5	18.00
Eu	Beech	S/E	26, 38, 48.5, 60	100 - 300	3.0	25.50
Eng	Cherry	T&T	27, 34,41,54,65,	120 - 250	3.8	30.00
N.Am	Cherry	S/E	27, 41, 54	100 - 200	2.7	49.00
Eng	Cedar of Leb.	T&T	20, 27, 34, 41, 54, 80,	200 - 1000	4.5	21.00
